SUBJECT INDEX

Ab initio calculations
The chemistry of gas-phase ions: a theoretical approach 339
Analytical pyrolysis mass spectrometry
Analytical pyrolysis mass spectrometry: new vistas opened by temperature-resolved in-source PYMS 755

Biochemical applications
Trends in biochemical and biomedical applications of mass spectrometry 683
Biomedical applications
Quantitative biomedical mass spectrometry 723
Trends in biochemical and biomedical applications of mass spectrometry 683
Biomolecules
Desorption methods in mass spectrometry 265

Charge-remote fragmentations
Charge-remote fragmentations: method, mechanism and applications 137
Chemometrics
Chemometrics in mass spectrometry 811
Clusters
Reactions and properties of clusters 167
Continuous-flow fast atom bombardment
Continuous-flow fast atom bombardment: recent advances and applications 449

Distonic ions
Unimolecular reaction mechanisms: the role of reactive intermediates 825
Drug metabolism
Advances in the application of mass spectrometry to studies of drug metabolism, pharmacokinetics and toxicology 289

Environmental sciences
Mass spectrometry and the environmental sciences 369

Flowing afterglow
Advances in flowing afterglow and selected-ion flow tube techniques 503
FT-ICR MS
Fourier transform ion cyclotron resonance mass spectrometry: technique developments 37

Gas chromatography–isotope ratio mass spectrometry
New technologies for small sample stable isotope measurement: static vacuum gas source mass spectrometry, laser probes, ion probes and gas chromatography–isotope ratio mass spectrometry 477
Gas-phase ion chemistry
Gas-phase ion chemistry versus solution chemistry 395
The chemistry of gas-phase ions: a theoretical approach 339

High temperature mass spectrometry
High temperature studies 739
High-mass mass spectrometry
"High-masses" 635
Hyphenated methods
Hyphenated methods in mass spectrometry 857

Instrumentation
Mass spectrometers: instrumentation 1
Ion thermochemistry
The present state and utility of ion thermochemistry 381
Ion trap mass spectrometry
Ion trap mass spectrometry 71
Ion/molecule reactions
Dynamics of ion/molecule reactions 661
Fourier transform ion cyclotron resonance mass spectrometry: technique developments 37
Ion/neutral complexes
Unimolecular reaction mechanisms: the

role of reactive intermediates 825
Isotope dilution mass spectrometry
Isotope dilution mass spectrometry 575

Laser desorption
Desorption methods in mass spectrometry 265
Fourier transform ion cyclotron resonance mass spectrometry: technique developments 37

Magic numbers
Reactions and properties of clusters 167
Multiphoton mass spectrometry
Multiphoton and soft X-ray ionization mass spectrometry 191

Neutralization–reionization mass spectrometry
Neutralization–reionization mass spectrometry 221
Nucleic acid chemistry
Progress in mass spectrometry of nucleic acid constituents: analysis of xenobiotic modifications and measurement at high mass 593

Oligonucleotides
Progress in mass spectrometry of nucleic acid constituents: analysis of xenobiotic modifications and measurement at high mass 593

Particle desorption
Desorption methods in mass spectrometry 265
Peptides
Status of, and developments in, mass spectrometry of peptides and proteins 789
Pharmacokinetics
Advances in the application of mass spectrometry to studies of drug metabolism, pharmacokinetics and toxicology 289
Photodisociation
Studies of ion structures by photodissociation 617
Plasma source mass spectrometry
Plasma source mass spectrometry 519
Proteins
Status of, and developments in, mass spectrometry of peptides and proteins 789

RRKM-QET
Recent developments in applications of RRKM-QET 315

SIFT
Advances in flowing afterglow and selected-ion flow tube techniques 503
Soft X-ray ionization mass spectrometry
Multiphoton and soft X-ray ionization mass spectrometry 191
Solution chemistry
Gas-phase ion chemistry versus solution chemistry 395
Static vacuum gas source mass spectrometry
New technologies for small sample stable isotope measurement: static vacuum gas source mass spectrometry, laser probes, ion probes and gas chromatography–isotope ratio mass spectrometry 477

Toxicology
Advances in the application of mass spectrometry to studies of drug metabolism, pharmacokinetics and toxicology 289
Recent applications of mass spectrometry in forensic toxicology 237
